

## American Association of Pharmaceutical Scientists Transfer of Copyright Agreement

Journal:  *The AAPS Journal* or  *AAPS PharmSciTech*

Title: \_\_\_\_\_

Author(s) name(s): \_\_\_\_\_

Corresponding Author's name, address, affiliation and email: \_\_\_\_\_

The transfer of copyright gives AAPS the right to develop, promote, distribute, sell, and archive a body of scientific works in the United States and throughout the world (for U.S. government employees: to the extent transferable). The Author hereby grants and assigns to AAPS all rights in and to Author's work in and contributions to the Work. In connection with this assignment, the Author acknowledges that AAPS will have the right to print, publish, create derivative works, and sell the Work throughout the world, all rights in and to all revisions or versions or subsequent editions of the Work in all languages and media throughout the world and shall be the sole owner of the copyright in the Work throughout the world. AAPS shall register the Work with the Copyright Office of the United States in its own name within four months after first publication.

If the Author is an employee of the U.S. Government and performed this work as part of their employment, the contribution is not subject to U.S. copyright protection. If the work was performed under Government contract, but the Author is not a Government employee, AAPS grants the U.S. Government royalty-free permission to reproduce all or part of the contribution and to authorize others to do so for U.S. Government purposes. If any of the above Authors on this agreement is an officer or employee of the U.S. Government reference will be made to this status on the signature page.

An author may self-archive his/her article on his/her personal website; however we request that acknowledgement is given to the AAPS publication and a link to the published article on the AAPS website is inserted. The Author must ensure that the publication by AAPS is properly credited and that the relevant copyright notice is repeated verbatim.

The author(s), however, reserve the following rights: (a) All proprietary rights other than copyrights, such as patent rights, (b) The right to use all or part of this article, including tables and figures in future works of their own, provided that the proper acknowledgment is made to the Publisher as copyright holder, and (c) The right to make copies of this article for his/her own use, but not for sale.

I warrant and represent that the Work does not violate any proprietary or personal rights of others (including, without limitation, any copyrights or privacy rights); that the Work is factually accurate and contains no matter libelous or otherwise unlawful; that I have substantially participated in the creation of the Work and that it represents my original work sufficient for me to claim authorship. I further warrant and represent that I have no financial interest in the subject matter of the Work or any affiliation with an organization or entity with a financial interest in the subject matter of the Work, other than as previously disclosed to the Association.

I have the consent of each author to transfer and assign any and all right, title, and interest; including copyright of the article referenced above. I hereby assign and transfer to the American Association of Pharmaceutical Scientists copyright and all rights under it. I further confirm that this article has not been published elsewhere, nor is it under consideration by any other publisher.
